Florida

Prepared by the Committee on Oversight and Reform and Subcommittee on Environment

Under the Paris Agreement, nearly every nation of the world agreed to act together to keep global warming below 2 degrees Celsius (C). Three years ago, President Trump announced that he was withdrawing the U.S. from that agreement.

What if he hadn't broken our promise? What if we keep global warming below 2 degrees?

**In just Florida alone,
over the next 50 years we could prevent approximately:**

101,000 **premature deaths**

40,000 **emergency room visits and hospitalizations for cardiovascular and respiratory disease**

More than 23 million lost workdays

$

The economic value of these health benefits would exceed $750 billion in Florida.
