

Enhancing Electric Grid Resilience Act
Rep. Kathy Castor
Section by Section

Section 1. Short Title.

This section establishes the title of the bill.

Section 2. Allocation of Costs of Certain Transmission Facilities

This section encourages broad cost allocation for transmission facilities of national significance consistent with the “beneficiary pays” principle. A transmission facility of national significance is an interstate or offshore wind transmission line that has a transmission capacity of at least 1,000 megawatts, or an upgrade or expansion of an interstate or offshore wind transmission line that increases the transmission capacity by at least 500 megawatts.
